OILTROL

P1007.9302

OBM Drilling

Product Description

OILTROL™ is a high softening point gilsonite used to control HTHP fluid loss in invert emulsion drilling fluids.

Product Function

OILTROL™ is effective in controlling HTHP fluid loss in oil base drilling fluids.

Features and Benefits

OILTROL™ controls HTHP fluid loss on wells where the bottom hole temperature exceeds 200?C (392?F). OILTROL™ particle size distribution is optimized to ensure the lowest concentration possible is needed to provide required fluid loss control. OILTROL™ contributes to emulsion stability and has little effect on rheology.

Recommended Treatment

OILTROL™ treatment levels are 2–10 lbs/bbl (5.7–28.6 kgs/m³). Actual concentrations required should be determined by pilot testing and encountered bore hole conditions.

International Shipping References

Transportation of OILTROL™ is not restricted by any regulatory agency.

Standard Packing

OILTROL™ is packaged in 25 kgs multiwall paper sack.

Safe Handling Recommendations

Utilize normal precautions for employee protection when handling chemical products. Utilize appropriate respirator, gloves, goggles and apron. Refer to the Material Safety Data Sheet (MSDS) for this product prior to use.

Typical Physical Properties

- Physical State: Solid
- Reservoir Compatible: Non-Reservoir
- Sub Category:
- SG value: 1.1
- Bulk Density Kg/m³: 400 - 500
- Max Temperature: 350
- Category: Filtration Control
- Product Tier: Regular
- Appearance: Black/brown powder
